## workshop **CITY LIGHTING SYSTEM**

21st- 26th May 2012

theory and applications (9.00 – 13.00 / 14.00 – 17.00 – 18.30)

A proper use of light highlights and enhances the semantic quality of the architectural environment and makes possible a strong and alive relation between built environment and urban space surrounding them. Lighting leads and orients people through the town but also allows us to understand better the qualities of urban areas and architecture, creating an “emotional” relation with the scenery of every day.

### Who can attend the workshop

Architects, engineers, technicians, technical promoters are allowed to attend the course. A basic knowledge of the lighting fundamentals is an essential requirement.
